***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Teegardin et al 2,774,517.

Teegardin et al show a fluid dispensing system comprising a pump body 12, plunger 22 and outlet valve 34.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Teegardin et al in view of Grothoff 4,775,079.

Teegardin et al lack a shroud and vent opening. Grothoff shows a shroud 82 and vent opening 86 to allow dispensing in the upright or inverted position. It would have been obvious to one of ordinary skill in the art to have modified the Teegardin et al dispenser with a shroud and vent as taught by Grothoff to dispense in the upright or inverted position.

Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Teegardin et al in view of Gillingham et al 5,738,250.

Teegardin et al lacks a shipping seal. Gillingham et al show a shipping seal 33. It would have been obvious to one of ordinary skill in the art to have modified the Teegardin et al dispenser with a shipping seal as taught by Gillingham et al to prevent inadvertent dispensing.

***Allowable Subject Matter***

Claims 1-17 and 26-28 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 18-25 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
